Date: date survey was conducted, Survey type: Circle one to indicate if you counted all birds, only birds that were oiled, and if observers were prepared to collect birds or not (regardless of whether or not any were collected, Location Name and/or Beach Division: general description including county; Beach Division if implemented. Start/end location, lat/long, and time (record datum elsewhere). Beach conditions should also provide any observations of oil on the beach. Distance Searched: Estimate distance of stretch covered. Method: Circule one to indicate if done on ATV, foot, or from scan only. Observers: Please give at least first initial and last name of all observers.
Can record multiple individuals per line of data, OR give individuals different lines of data (e.g., if have collection or oil info to record). Species: 4 letter code, Time: 24 hour time for observation or collection, L/W/F: alpha code for whether the observation was a bird on Land, in Water, or in Flight, Col?: whether or not bird(s) were collected (Y) or not ( N ), Alive/Dead: the count of birds observed in each condition, \% Oiled 0: not visibly oiled; $1<2 \%$; 2: 2-25\%; 3: 26-50\%; 4:51-75\%; 5: 76-100\%; 99: not evaluated, Oil location: Part of body where oil observed
